

MRC Laboratory
of Molecular
Biology

Hello,

Do you want to take part in the [Cambridge Festival](#) from home?

At the Medical Research Council Laboratory of Molecular Biology (MRC LMB) in Cambridge, our online activity, '**Worms Are Cleverer Than You Think!**' is available for you throughout the festival (31st March – 10th April).

What does a worm neuroscientist do?

What can a tiny worm actually tell us about how our brains work?

Find out with our **videos**, **games**, and **activities** via this [link](#):
<https://www3.mrc-lmb.cam.ac.uk/sites/cambridgefestival/worms/>

Match mutants to their names, play our sweet-finding board game, and ask our worm scientists a question on how worms help us understand ageing and using our senses.

You'll be amazed what a tiny worm can tell us!

Many thanks,

LMB Public Engagement Team
